10.2.4 Demographics and baseline data

Listing 10.2.4 / 1: Inclusion/exclusion criteria

Inclusion/ Exclusion Criterion Short Name	Inclusion/Exclusion Criterion
IN001	Females aged 40 to 65 years, inclusive, at signing of informed consent.
IN002	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 2.0)
IN002A	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)
IN003	Moderate to severe HF associated with the menopause and seeking treatment for this condition.
IN004	Negative urine pregnancy test at screening.
IN005	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)
IN005A	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)
IN006	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 2.0)
IN006A	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 4.0)
IN007	BMI between 18 and 38 kg/m2 at screening
IN008	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.
IN009	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)
IN010	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.

Listing 10.2.4 / 1: Inclusion/exclusion criteria

Inclusion/ Exclusion Criterion Short Name	Inclusion/Exclusion Criterion
EX001	Any clinically significant prior or ongoing history of arrhythmias, heart block and QT prolongation either determined through clinical history or on ECG evaluation.
EX002	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in exclusion criteria 10).
EX002A	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).
EX002B	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)
EX003	Any active ongoing condition that could cause difficulty in interpreting VMS such as: infection that could cause pyrexia, pheochromocytoma, carcinoid syndrome.
EX004	Current or previous history of any malignancy (except basal and squamous cell skin tumours).
EX004A	Current or history (except complete remission for 5 years or more) of any malignancy (except basal and squamous cell skin tumours). Women receiving adjuvant endocrine (see protocol version 3.0)
EX005	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)
EX006	A history of untreated hyperthyroidism or hypothyroidism. Treated hypothyroidism with normal thyroid function test results during screening and a stable (for >= 3 months (see protocol version 2.0)
EX006A	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)
EX007	Any unexplained post-menopausal bleeding.
EX007A	Any unexplained post-menopausal uterine bleeding.
EX008	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.
EX009	Renal impairment greater than moderate (i.e. estimated glomerular filtration rate < 30 mL/min) at screening

Listing 10.2.4 / 1: Inclusion/exclusion criteria

Inclusion/ Exclusion Criterion Short Name	Inclusion/Exclusion Criterion
EX009A	Renal impairment greater than moderate (i.e. estimated glomerular filtration rate < 30 mL/min/1.73m2) at screening
EX010	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN unless explained by (see protocol version 2.0)
EX010A	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 3.0)
EX010B	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)
EX011	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)
EX012	Any other history, condition, therapy, or uncontrolled intercurrent illness which could in the opinion of the investigator affect compliance with study requirements.
EX013	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.
EX014	Inability to comply with the use of prohibited medications as described in Sections 6.8.1 and 10.6.
EX015	Concurrent (or within 2 months prior to signing of ICF) participation in a clinical study with an investigational medicinal product (including medical devices).
EX016	At screening a suicidal ideation in the past 6 months (as indicated by 'Yes' on item 4 or item 5 of the suicidal ideation section of the eC-SSRS) or suicidal behavior (see protocol version 2.0)
EX017	Clinically relevant drug or alcohol abuse within 12 months of signing of informed consent. Clinically relevant alcohol or drug abuse is behavior that meets the DSM-5 (see protocol version 2.0)
EX018	Dependent on the investigator, the contract research organisation(s) or Sponsor for education or employment (e.g. family members, employees, people who receive grants/education).
EX019	Known hypersensitivity to elinzanetant or any of the excipients in the formulation.

Listing 10.2.4 / 1: Inclusion/exclusion criteria

Inclusion/ Exclusion Criterion Short Name	Inclusion/Exclusion Criterion
EX020	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
140011001/52/F/B	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
140011002/48/F/B	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
140011003/51/F/B	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)	YES
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
140011005/52/F/B	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
140011006/55/F/B	INCLUSION	BMI between 18 and 38 kg/m2 at screening	NO
140011009/57/F/B	EXCLUSION	At screening a suicidal ideation in the past 6 months (as indicated by 'Yes' on item 4 or item 5 of the suicidal ideation section of the eC-SSRS) or suicidal behavior (see protocol version 2.0)	YES
140011011/58/F/B	INCLUSION	BMI between 18 and 38 kg/m2 at screening	NO
140011012/56/F/B	EXCLUSION	Any other history, condition, therapy, or uncontrolled intercurrent illness which could in the opinion of the investigator affect compliance with study requirements.	YES
140011013/56/F/B	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140011014/56/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
140011016/58/F/B	EXCLUSION	Inability to comply with the use of prohibited medications as described in Sections 6.8.1 and 10.6.	YES
140011017/59/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any other history, condition, therapy, or uncontrolled intercurrent illness which could in the opinion of the investigator affect compliance with study requirements.	YES
140031001/46/F/B	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
140031004/60/F/B	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
140031005/65/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 3.0)	YES
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
	EXCLUSION	Any other history, condition, therapy, or uncontrolled intercurrent illness which could in the opinion of the investigator affect compliance with study requirements.	YES
140031006/57/F/B	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140031007/50/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
140031008/62/F/B	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140031009/51/F/W	INCLUSION	BMI between 18 and 38 kg/m2 at screening	NO
140031012/65/F/B	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140031013/58/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any other history, condition, therapy, or uncontrolled intercurrent illness which could in the opinion of the investigator affect compliance with study requirements.	YES
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140031014/48/F/MUL	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140031016/54/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140031017/46/F/W	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 4.0)	NO
140051003/50/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140051004/43/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
140051006/61/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
140051008/58/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
140051009/56/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
140051010/51/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO

	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
140061010/60/F/B	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140061011/56/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
	EXCLUSION	Any other history, condition, therapy, or uncontrolled intercurrent illness which could in the opinion of the investigator affect compliance with study requirements.	YES
	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
140061012/57/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
140061013/55/F/NH	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
140061014/47/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140061016/52/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant prior or ongoing history of arrhythmias, heart block and QT prolongation either determined through clinical history or on ECG evaluation.	YES
140061017/50/F/B	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
140091001/58/F/W	EXCLUSION	Current or previous history of any malignancy (except basal and squamous cell skin tumours).	YES
140091003/56/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
140091004/52/F/MUL	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 3.0)	YES
140091005/46/F/B	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO
140091006/59/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 4.0)	NO
	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
	EXCLUSION	Any other history, condition, therapy, or uncontrolled intercurrent illness which could in the opinion of the investigator affect compliance with study requirements.	YES
140091007/63/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140091008/54/F/MUL	EXCLUSION	Current or history (except complete remission for 5 years or more) of any malignancy (except basal and squamous cell skin tumours). Women receiving adjuvant endocrine (see protocol version 3.0)	YES

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140091009/51/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140091010/55/F/W	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO
140161004/54/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140161006/56/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140161007/53/F/B	INCLUSION	BMI between 18 and 38 kg/m2 at screening	NO
140161008/49/F/MUL	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
140161009/53/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
140161014/57/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140171001/62/F/B	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140171002/53/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in exclusion criteria 10).	YES
140171003/51/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140171005/58/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in exclusion criteria 10).	YES
140171006/63/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140171007/50/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	At screening a suicidal ideation in the past 6 months (as indicated by 'Yes' on item 4 or item 5 of the suicidal ideation section of the eC-SSRS) or suicidal behavior (see protocol version 2.0)	YES
140171009/64/F/B	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO
	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
140181002/60/F/W	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN unless explained by (see protocol version 2.0)	YES
140181003/58/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
	EXCLUSION	Inability to comply with the use of prohibited medications as described in Sections 6.8.1 and 10.6.	YES
140181005/63/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140181006/48/F/W	EXCLUSION	A history of untreated hyperthyroidism or hypothyroidism. Treated hypothyroidism with normal thyroid function test results during screening and a stable (for >= 3 months (see protocol version 2.0)	YES
140181007/55/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140181009/46/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 2.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in exclusion criteria 10).	YES
140181010/59/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
140181011/51/F/W	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
140181012/50/F/W	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
140181013/47/F/A	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140181014/62/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
140181015/51/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140181016/54/F/W	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 3.0)	YES
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
140181017/54/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140181018/54/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140181019/52/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140181020/60/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
140181021/52/F/B	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
140181023/64/F/B	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140181024/41/F/W	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
140181026/65/F/W	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140181027/50/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
140181028/50/F/NR	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any other history, condition, therapy, or uncontrolled intercurrent illness which could in the opinion of the investigator affect compliance with study requirements.	YES
140181030/54/F/W	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO
	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
140181031/52/F/W	EXCLUSION	Inability to comply with the use of prohibited medications as described in Sections 6.8.1 and 10.6.	YES
140181033/57/F/W	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
140191001/57/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140191002/56/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in exclusion criteria 10).	YES
140191003/50/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 2.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN unless explained by (see protocol version 2.0)	YES
140191004/53/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140191006/65/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
140191008/52/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
140191009/52/F/W	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140191010/53/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
140191011/45/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
140191014/53/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 2.0)	NO
	EXCLUSION	A history of untreated hyperthyroidism or hypothyroidism. Treated hypothyroidism with normal thyroid function test results during screening and a stable (for >= 3 months (see protocol version 2.0)	YES
140191015/51/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140191016/54/F/W	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 2.0)	NO
140191017/49/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140191018/46/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
140201001/50/F/B	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 2.0)	NO
	EXCLUSION	A history of untreated hyperthyroidism or hypothyroidism. Treated hypothyroidism with normal thyroid function test results during screening and a stable (for >= 3 months (see protocol version 2.0)	YES
140201003/63/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140251001/50/F/B	INCLUSION	BMI between 18 and 38 kg/m2 at screening	NO
	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 2.0)	NO
140251002/52/F/W	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
140251003/59/F/W	EXCLUSION	Concurrent (or within 2 months prior to signing of ICF) participation in a clinical study with an investigational medicinal product (including medical devices).	YES
140251004/56/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
	EXCLUSION	Any other history, condition, therapy, or uncontrolled intercurrent illness which could in the opinion of the investigator affect compliance with study requirements.	YES
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140251005/59/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	EXCLUSION	Any other history, condition, therapy, or uncontrolled intercurrent illness which could in the opinion of the investigator affect compliance with study requirements.	YES
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140251006/51/F/B	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
140251007/58/F/W	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN unless explained by (see protocol version 2.0)	YES
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in exclusion criteria 10).	YES
140251009/57/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140251012/53/F/NR	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
140251013/59/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
140251014/57/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
140251015/52/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
140251016/47/F/B	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 3.0)	YES
140251017/53/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
140251018/55/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140251019/56/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140251020/53/F/W	EXCLUSION	Inability to comply with the use of prohibited medications as described in Sections 6.8.1 and 10.6.	YES
140251021/52/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
140301001/54/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140301002/53/F/B	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN unless explained by (see protocol version 2.0)	YES
140301003/54/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140301004/55/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140301005/54/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140301006/55/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140301009/62/F/W	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140301010/59/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140301011/53/F/W	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140301012/61/F/B	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140301013/51/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140301014/63/F/W	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140301015/54/F/B	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
140301016/51/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
140301018/48/F/W	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 4.0)	NO
140301019/46/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
	EXCLUSION	Inability to comply with the use of prohibited medications as described in Sections 6.8.1 and 10.6.	YES
140301021/59/F/W	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
140301022/58/F/B	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140301023/54/F/B	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
140301024/55/F/W	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)	YES
140301025/57/F/B	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
140301026/60/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140301027/57/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
140301028/50/F/B	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)	YES
140301029/56/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
140301030/59/F/B	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140301032/51/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
140361001/51/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140361002/56/F/.	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
	EXCLUSION	A history of untreated hyperthyroidism or hypothyroidism. Treated hypothyroidism with normal thyroid function test results during screening and a stable (for >= 3 months (see protocol version 2.0)	YES
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN unless explained by (see protocol version 2.0)	YES
	EXCLUSION	Any active ongoing condition that could cause difficulty in interpreting VMS such as: infection that could cause pyrexia, pheochromocytoma, carcinoid syndrome.	YES
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in exclusion criteria 10).	YES
	EXCLUSION	Any clinically significant prior or ongoing history of arrhythmias, heart block and QT prolongation either determined through clinical history or on ECG evaluation.	YES
	EXCLUSION	Any other history, condition, therapy, or uncontrolled intercurrent illness which could in the opinion of the investigator affect compliance with study requirements.	YES
	EXCLUSION	Any unexplained post-menopausal bleeding.	YES
	EXCLUSION	At screening a suicidal ideation in the past 6 months (as indicated by 'Yes' on item 4 or item 5 of the suicidal ideation section of the eC-SSRS) or suicidal behavior (see protocol version 2.0)	YES
	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
	EXCLUSION	Clinically relevant drug or alcohol abuse within 12 months of signing of informed consent. Clinically relevant alcohol or drug abuse is behavior that meets the DSM-5 (see protocol version 2.0)	YES

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
	EXCLUSION	Concurrent (or within 2 months prior to signing of ICF) participation in a clinical study with an investigational medicinal product (including medical devices).	YES
	EXCLUSION	Current or previous history of any malignancy (except basal and squamous cell skin tumours).	YES
	EXCLUSION	Dependent on the investigator, the contract research organisation(s) or Sponsor for education or employment (e.g. family members, employees, people who receive grants/education).	YES
	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
	EXCLUSION	Inability to comply with the use of prohibited medications as described in Sections 6.8.1 and 10.6.	YES
	EXCLUSION	Known hypersensitivity to elinzanetant or any of the excipients in the formulation.	YES
	EXCLUSION	Renal impairment greater than moderate (i.e. estimated glomerular filtration rate < 30 mL/min) at screening	YES
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140371003/53/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140371005/52/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140371006/56/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 3.0)	YES
140371007/50/F/MUL	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
140371008/51/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
140371009/61/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
140371011/56/F/NR	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140371015/51/F/NR	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140371016/55/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 3.0)	YES

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
140371018/59/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
140371021/55/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140371022/52/F/W	INCLUSION	BMI between 18 and 38 kg/m2 at screening	NO
	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
140371023/56/F/MUL	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140371025/55/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
140371026/54/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 3.0)	YES
140371031/52/F/NR	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140371032/57/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140371034/62/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140371037/51/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
140371039/52/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140401002/55/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
	EXCLUSION	Inability to comply with the use of prohibited medications as described in Sections 6.8.1 and 10.6.	YES
140401004/65/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
140401005/52/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140401006/50/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
140401007/52/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140401008/58/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 3.0)	YES
140401009/58/F/A	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140401012/60/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 2.0)	NO
140401013/53/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140401014/63/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140401015/54/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140401016/63/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140401019/52/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)	YES
	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
140401020/52/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
140431001/55/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
140431002/63/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO

140431047/51/F/B	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
140431048/48/F/W	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)	YES
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
140461001/61/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140461002/65/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140461004/59/F/W	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in exclusion criteria 10).	YES
140461005/51/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
140461006/52/F/B	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in exclusion criteria 10).	YES
140461009/53/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140461010/60/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
140461011/51/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140461015/52/F/W	EXCLUSION	Any other history, condition, therapy, or uncontrolled intercurrent illness which could in the opinion of the investigator affect compliance with study requirements.	YES
140461016/59/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140461017/53/F/B	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)	YES
140461018/59/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
140461019/56/F/B	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140461020/57/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140461021/59/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140461022/50/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
140461023/60/F/W	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140461024/48/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
140471002/63/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
140471004/54/F/W	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
140471006/56/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140471008/56/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
140471009/48/F/A	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
140471010/51/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140471012/53/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
140471013/63/F/W	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 3.0)	YES
140471015/53/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140471016/54/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
140471017/51/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140471018/52/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
140471019/50/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140471020/47/F/B	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140471021/61/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140471023/51/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140471024/52/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
140471025/53/F/W	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 4.0)	NO
140471026/58/F/W	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
140471027/57/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
140471028/52/F/W	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)	YES
140471029/54/F/W	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
140471031/45/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140471032/57/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140471033/56/F/B	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140491001/63/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140491002/64/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	EXCLUSION	Current or previous history of any malignancy (except basal and squamous cell skin tumours).	YES
140491003/60/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in exclusion criteria 10).	YES
	EXCLUSION	Any other history, condition, therapy, or uncontrolled intercurrent illness which could in the opinion of the investigator affect compliance with study requirements.	YES
140491004/62/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
140491005/50/F/B	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140491006/41/F/B	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
140491007/50/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140491008/54/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140491009/58/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO

	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140541009/55/F/B	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
140541010/56/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140541013/56/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
140541017/57/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 3.0)	YES
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
140541018/62/F/B	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 3.0)	YES
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
140541020/62/F/B	EXCLUSION	Any clinically significant prior or ongoing history of arrhythmias, heart block and QT prolongation either determined through clinical history or on ECG evaluation.	YES
	EXCLUSION	Any other history, condition, therapy, or uncontrolled intercurrent illness which could in the opinion of the investigator affect compliance with study requirements.	YES
140541024/50/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140541025/49/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140541026/64/F/W	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 4.0)	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
140581001/48/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140581002/58/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140581003/64/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
	EXCLUSION	Inability to comply with the use of prohibited medications as described in Sections 6.8.1 and 10.6.	YES
140581004/58/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140581005/58/F/B	EXCLUSION	Inability to comply with the use of prohibited medications as described in Sections 6.8.1 and 10.6.	YES
140581006/44/F/B	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN unless explained by (see protocol version 2.0)	YES
140581007/54/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
140581008/44/F/W	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in exclusion criteria 10).	YES
140581009/44/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 2.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in exclusion criteria 10).	YES
140581011/52/F/W	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
140581012/50/F/W	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
140581013/64/F/AI	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
140581014/43/F/W	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 3.0)	YES
140581015/58/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
140581016/49/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
140601001/54/F/W	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
140601002/47/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140601003/57/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
140601004/54/F/W	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
140601006/43/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
140601007/55/F/B	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140601008/55/F/W	EXCLUSION	Any clinically significant prior or ongoing history of arrhythmias, heart block and QT prolongation either determined through clinical history or on ECG evaluation.	YES
140601009/52/F/W	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 4.0)	NO
140601011/57/F/NR	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)	YES
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
140601014/58/F/B	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140601015/50/F/A	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140601016/58/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140601017/64/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
	EXCLUSION	Inability to comply with the use of prohibited medications as described in Sections 6.8.1 and 10.6.	YES
140601019/53/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140601020/53/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140721001/50/F/W	EXCLUSION	A history of untreated hyperthyroidism or hypothyroidism. Treated hypothyroidism with normal thyroid function test results during screening and a stable (for >= 3 months (see protocol version 2.0)	YES
140841001/52/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140841002/63/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
140841003/54/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
140841004/48/F/W	EXCLUSION	Any other history, condition, therapy, or uncontrolled intercurrent illness which could in the opinion of the investigator affect compliance with study requirements.	YES
140841005/61/F/B	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140841006/48/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
140841007/48/F/W	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 3.0)	YES
140841010/60/F/B	EXCLUSION	Clinically relevant drug or alcohol abuse within 12 months of signing of informed consent. Clinically relevant alcohol or drug abuse is behavior that meets the DSM-5 (see protocol version 2.0)	YES
140841011/54/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140841012/53/F/W	EXCLUSION	Clinically relevant drug or alcohol abuse within 12 months of signing of informed consent. Clinically relevant alcohol or drug abuse is behavior that meets the DSM-5 (see protocol version 2.0)	YES
140841013/46/F/B	EXCLUSION	Any other history, condition, therapy, or uncontrolled intercurrent illness which could in the opinion of the investigator affect compliance with study requirements.	YES
140841014/44/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
140841015/61/F/W	INCLUSION	BMI between 18 and 38 kg/m2 at screening	NO
140841016/49/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140841017/59/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant prior or ongoing history of arrhythmias, heart block and QT prolongation either determined through clinical history or on ECG evaluation.	YES
140841018/64/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant prior or ongoing history of arrhythmias, heart block and QT prolongation either determined through clinical history or on ECG evaluation.	YES
140841020/53/F/B	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140841021/52/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140841022/46/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
140841023/57/F/W	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
140841024/64/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140841025/57/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140841026/55/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
140841028/52/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140841029/57/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140841030/54/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
140841031/48/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
140841032/51/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
140841034/55/F/W	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140841035/63/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140841036/55/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140841037/50/F/B	EXCLUSION	Inability to comply with the use of prohibited medications as described in Sections 6.8.1 and 10.6.	YES
140841039/45/F/B	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
140841040/60/F/B	EXCLUSION	Any clinically significant prior or ongoing history of arrhythmias, heart block and QT prolongation either determined through clinical history or on ECG evaluation.	YES
140851001/54/F/B	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
	EXCLUSION	Any other history, condition, therapy, or uncontrolled intercurrent illness which could in the opinion of the investigator affect compliance with study requirements.	YES
140851002/63/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
	EXCLUSION	Any other history, condition, therapy, or uncontrolled intercurrent illness which could in the opinion of the investigator affect compliance with study requirements.	YES
140851004/43/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140851005/53/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
	EXCLUSION	Any other history, condition, therapy, or uncontrolled intercurrent illness which could in the opinion of the investigator affect compliance with study requirements.	YES
140851006/51/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
140851007/55/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)	YES
140851008/57/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
140851009/50/F/B	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
140851010/51/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
140851012/54/F/MUL	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
140851013/51/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
140851014/56/F/B	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
140851015/58/F/W	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
140851016/49/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140851017/53/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
140851018/59/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
	EXCLUSION	Any other history, condition, therapy, or uncontrolled intercurrent illness which could in the opinion of the investigator affect compliance with study requirements.	YES
140851019/55/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140851020/47/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140871001/41/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 2.0)	NO
140871002/57/F/B	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN unless explained by (see protocol version 2.0)	YES
140871003/61/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
140871004/46/F/W	EXCLUSION	A history of untreated hyperthyroidism or hypothyroidism. Treated hypothyroidism with normal thyroid function test results during screening and a stable (for >= 3 months (see protocol version 2.0)	YES
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in exclusion criteria 10).	YES
140871005/54/F/W	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
140911001/48/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 2.0)	NO
	EXCLUSION	A history of untreated hyperthyroidism or hypothyroidism. Treated hypothyroidism with normal thyroid function test results during screening and a stable (for >= 3 months (see protocol version 2.0)	YES
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in exclusion criteria 10).	YES
	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
140911002/52/F/W	EXCLUSION	Concurrent (or within 2 months prior to signing of ICF) participation in a clinical study with an investigational medicinal product (including medical devices).	YES
140911003/53/F/W	EXCLUSION	Current or history (except complete remission for 5 years or more) of any malignancy (except basal and squamous cell skin tumours). Women receiving adjuvant endocrine (see protocol version 3.0)	YES
140911004/58/F/W	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140931001/61/F/MUL	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 2.0)	NO
	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO
	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
	EXCLUSION	Any clinically significant prior or ongoing history of arrhythmias, heart block and QT prolongation either determined through clinical history or on ECG evaluation.	YES
140931002/64/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 2.0)	NO
	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140931003/56/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 2.0)	NO
	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140931004/52/F/B	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 2.0)	NO
	EXCLUSION	Any unexplained post-menopausal bleeding.	YES
140931007/60/F/NR	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140931009/54/F/B	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140981001/60/F/W	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140981002/50/F/W	INCLUSION	BMI between 18 and 38 kg/m2 at screening	NO
	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
140981003/63/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140981004/49/F/W	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140981005/49/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140981006/56/F/W	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140981007/52/F/B	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140981008/55/F/W	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
140981010/52/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140981011/56/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
140981012/60/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
140981015/54/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 4.0)	NO
	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
140981016/54/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140981017/50/F/W	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140981018/51/F/W	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140981019/53/F/W	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140981020/54/F/W	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140981021/55/F/W	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
140981022/50/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
140981023/54/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140981024/57/F/W	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140981025/51/F/W	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140981026/62/F/W	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140981027/53/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
	EXCLUSION	Inability to comply with the use of prohibited medications as described in Sections 6.8.1 and 10.6.	YES
140981028/50/F/W	INCLUSION	Females aged 40 to 65 years, inclusive, at signing of informed consent.	NO
	EXCLUSION	Any clinically significant prior or ongoing history of arrhythmias, heart block and QT prolongation either determined through clinical history or on ECG evaluation.	YES
140991001/54/F/W	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO
	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
	EXCLUSION	At screening a suicidal ideation in the past 6 months (as indicated by 'Yes' on item 4 or item 5 of the suicidal ideation section of the eC-SSRS) or suicidal behavior (see protocol version 2.0)	YES
140991002/55/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
140991003/56/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140991004/57/F/W	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO
	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
140991005/66/F/W	INCLUSION	Females aged 40 to 65 years, inclusive, at signing of informed consent.	NO
140991006/48/F/MUL	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in exclusion criteria 10).	YES
140991007/55/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140991008/59/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
	EXCLUSION	Inability to comply with the use of prohibited medications as described in Sections 6.8.1 and 10.6.	YES
140991009/55/F/B	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
140991010/57/F/MUL	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140991011/59/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 3.0)	YES
	EXCLUSION	Any active ongoing condition that could cause difficulty in interpreting VMS such as: infection that could cause pyrexia, pheochromocytoma, carcinoid syndrome.	YES
140991012/59/F/W	INCLUSION	Females aged 40 to 65 years, inclusive, at signing of informed consent.	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140991013/57/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140991014/56/F/B	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140991015/47/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 3.0)	YES
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
140991016/48/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 3.0)	YES
140991017/59/F/MUL	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 3.0)	YES
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
	EXCLUSION	Any other history, condition, therapy, or uncontrolled intercurrent illness which could in the opinion of the investigator affect compliance with study requirements.	YES
140991019/52/F/W	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140991020/52/F/B	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140991021/56/F/B	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
140991022/51/F/W	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
140991023/48/F/B	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
140991024/54/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
140991026/57/F/W	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140991027/42/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140991028/53/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
140991029/53/F/W	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140991030/59/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES

	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
140991039/53/F/W	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140991040/46/F/B	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
140991041/56/F/B	INCLUSION	Moderate to severe HF associated with the menopause and seeking treatment for this condition.	NO
	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140991042/42/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140991044/57/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant prior or ongoing history of arrhythmias, heart block and QT prolongation either determined through clinical history or on ECG evaluation.	YES
140991046/53/F/A	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
140991047/48/F/W	INCLUSION	BMI between 18 and 38 kg/m2 at screening	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
140991051/53/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any other history, condition, therapy, or uncontrolled intercurrent illness which could in the opinion of the investigator affect compliance with study requirements.	YES
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
140991052/61/F/B	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
141051001/57/F/B	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
141051003/60/F/W	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN unless explained by (see protocol version 2.0)	YES
141051006/47/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
141051009/54/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 3.0)	YES
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
141051011/53/F/NH	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
141051013/64/F/W	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
141051014/62/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO
141051016/53/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
141051018/46/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141051022/63/F/B	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO
	EXCLUSION	Concurrent (or within 2 months prior to signing of ICF) participation in a clinical study with an investigational medicinal product (including medical devices).	YES
141051023/50/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141051025/60/F/B	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
141051027/56/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
141051028/57/F/W	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)	YES
	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
141051029/52/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
141051030/62/F/B	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
141051031/58/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 4.0)	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
141051032/53/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
141051034/48/F/B	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
141051037/53/F/W	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 4.0)	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
141051038/56/F/B	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
141051039/52/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
141051040/59/F/W	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
141051041/52/F/W	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 4.0)	NO
	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
141051042/52/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
141051043/47/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
141051044/60/F/B	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO
141061001/65/F/W	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
141061002/52/F/B	EXCLUSION	Concurrent (or within 2 months prior to signing of ICF) participation in a clinical study with an investigational medicinal product (including medical devices).	YES
141061003/63/F/B	INCLUSION	BMI between 18 and 38 kg/m2 at screening	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
141061004/55/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
141061005/57/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141061006/54/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
141061007/51/F/MUL	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
141061008/54/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
141061009/64/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
141061010/49/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
141061011/54/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
141061012/58/F/B	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
	EXCLUSION	Inability to comply with the use of prohibited medications as described in Sections 6.8.1 and 10.6.	YES
141061013/53/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
141061014/52/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
141061015/51/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
141101001/57/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141101002/51/F/B	INCLUSION	BMI between 18 and 38 kg/m2 at screening	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
141131018/52/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
141131019/59/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
141131022/50/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 3.0)	YES
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
141131023/52/F/W	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
141131025/54/F/W	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
141131026/61/F/W	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 3.0)	YES
141131027/55/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
141131028/60/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
141131029/54/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
141131030/54/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
141131031/53/F/W	INCLUSION	Moderate to severe HF associated with the menopause and seeking treatment for this condition.	NO
141131033/55/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
141131034/47/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
141131035/51/F/W	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
141131036/57/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141131037/55/F/W	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
141131038/48/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
141131039/53/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141131040/52/F/W	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO
	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
141131041/52/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)	YES
141131042/48/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
141131043/60/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	At screening a suicidal ideation in the past 6 months (as indicated by 'Yes' on item 4 or item 5 of the suicidal ideation section of the eC-SSRS) or suicidal behavior (see protocol version 2.0)	YES
141131044/62/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
141131045/53/F/AI	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
141131046/63/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
141131047/57/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
141131049/48/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
141131051/63/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
141131052/56/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
141131053/52/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
141131054/59/F/W	INCLUSION	Moderate to severe HF associated with the menopause and seeking treatment for this condition.	NO
141131055/62/F/W	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
141131056/42/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
141131057/50/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
141131058/56/F/W	INCLUSION	Moderate to severe HF associated with the menopause and seeking treatment for this condition.	NO
141131059/53/F/AI	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
141131060/60/F/W	EXCLUSION	Inability to comply with the use of prohibited medications as described in Sections 6.8.1 and 10.6.	YES
141141001/52/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141141002/49/F/W	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
141141003/53/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141141004/52/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
141141005/52/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
141141007/53/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141141008/57/F/B	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
141141009/50/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
141141010/56/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141141011/62/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141141012/61/F/B	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
141141016/53/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
141141018/61/F/B	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
141141019/59/F/W	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
141141021/51/F/W	EXCLUSION	Any unexplained post-menopausal uterine bleeding.	YES
141141022/62/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)	YES
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
141141023/62/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141141024/57/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141141027/46/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141191002/65/F/B	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in exclusion criteria 10).	YES
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
141191003/55/F/W	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 2.0)	NO
141191004/48/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141191005/64/F/B	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
141191008/58/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
141191009/53/F/W	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
141191011/58/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
141191012/58/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141191013/58/F/B	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
141191014/57/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141191017/50/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
	EXCLUSION	Inability to comply with the use of prohibited medications as described in Sections 6.8.1 and 10.6.	YES
141191018/52/F/B	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 2.0)	NO
	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO
	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES

	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO
	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
141191020/59/F/B	INCLUSION	Moderate to severe HF associated with the menopause and seeking treatment for this condition.	NO
141191022/50/F/W	INCLUSION	Moderate to severe HF associated with the menopause and seeking treatment for this condition.	NO
141191023/65/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141191024/61/F/W	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
141191025/55/F/A	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
141251004/54/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
141251006/61/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	EXCLUSION	A history of untreated hyperthyroidism or hypothyroidism. Treated hypothyroidism with normal thyroid function test results during screening and a stable (for >= 3 months (see protocol version 2.0)	YES
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN unless explained by (see protocol version 2.0)	YES
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in exclusion criteria 10).	YES
141251007/52/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	EXCLUSION	A history of untreated hyperthyroidism or hypothyroidism. Treated hypothyroidism with normal thyroid function test results during screening and a stable (for >= 3 months (see protocol version 2.0)	YES
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN unless explained by (see protocol version 2.0)	YES
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in exclusion criteria 10).	YES
141251009/55/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141251011/57/F/B	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN unless explained by (see protocol version 2.0)	YES
141251012/55/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141251013/62/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	EXCLUSION	A history of untreated hyperthyroidism or hypothyroidism. Treated hypothyroidism with normal thyroid function test results during screening and a stable (for >= 3 months (see protocol version 2.0)	YES
141251015/51/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 2.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN unless explained by (see protocol version 2.0)	YES
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in exclusion criteria 10).	YES
141251016/58/F/B	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
	EXCLUSION	Inability to comply with the use of prohibited medications as described in Sections 6.8.1 and 10.6.	YES
141251017/56/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
141251018/57/F/W	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
141251020/59/F/B	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
141251022/53/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
141251023/53/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
141251024/61/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 4.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
141251025/48/F/B	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
141331001/61/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141331002/52/F/W	EXCLUSION	Inability to comply with the use of prohibited medications as described in Sections 6.8.1 and 10.6.	YES
141331003/56/F/B	EXCLUSION	Clinically relevant drug or alcohol abuse within 12 months of signing of informed consent. Clinically relevant alcohol or drug abuse is behavior that meets the DSM-5 (see protocol version 2.0)	YES
141331005/58/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141361002/48/F/NR	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 2.0)	NO
	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO
	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 2.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN unless explained by (see protocol version 2.0)	YES

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in exclusion criteria 10).	YES
	EXCLUSION	Any other history, condition, therapy, or uncontrolled intercurrent illness which could in the opinion of the investigator affect compliance with study requirements.	YES
	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
	EXCLUSION	Renal impairment greater than moderate (i.e. estimated glomerular filtration rate < 30 mL/min) at screening	YES
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
141361003/65/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
141361004/46/F/W	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
141361005/48/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any other history, condition, therapy, or uncontrolled intercurrent illness which could in the opinion of the investigator affect compliance with study requirements.	YES
141361006/58/F/NR	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141361008/52/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
	EXCLUSION	Inability to comply with the use of prohibited medications as described in Sections 6.8.1 and 10.6.	YES
	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
141361010/43/F/NR	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141361011/49/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO
	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
141361015/56/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
	EXCLUSION	Inability to comply with the use of prohibited medications as described in Sections 6.8.1 and 10.6.	YES
141361018/52/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141361019/55/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
141361020/55/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141361021/62/F/B	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
141361022/56/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
141361023/52/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
141361026/58/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any other history, condition, therapy, or uncontrolled intercurrent illness which could in the opinion of the investigator affect compliance with study requirements.	YES
141361027/53/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141361028/56/F/W	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
141361029/52/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
141361030/56/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any other history, condition, therapy, or uncontrolled intercurrent illness which could in the opinion of the investigator affect compliance with study requirements.	YES
141361031/48/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
141361032/53/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)	YES
141361033/54/F/W	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
141361034/52/F/W	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)	YES
141361036/51/F/W	INCLUSION	BMI between 18 and 38 kg/m2 at screening	NO
141361039/51/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141361040/46/F/NR	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
141361041/65/F/W	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
141361043/60/F/B	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
141361044/54/F/B	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 4.0)	NO
141431006/59/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141431007/46/F/NR	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141431008/46/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
141431009/51/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141431011/60/F/W	INCLUSION	BMI between 18 and 38 kg/m2 at screening	NO
141431016/52/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
141791002/54/F/B	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
141791003/61/F/B	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
141791004/55/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
141791005/57/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141791006/54/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141791007/61/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
141791008/53/F/W	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO
141791009/52/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
141791011/54/F/W	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 4.0)	NO
141791012/51/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
141791014/55/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
141791015/54/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141801002/54/F/W	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
141801005/52/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
141801006/59/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
	EXCLUSION	Inability to comply with the use of prohibited medications as described in Sections 6.8.1 and 10.6.	YES
141801007/59/F/W	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)	YES
141801009/53/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141801011/53/F/W	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 4.0)	NO
141801013/44/F/MUL	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
141801015/60/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141801016/54/F/W	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
141801017/53/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141801018/51/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141881002/60/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
141881003/51/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
141881004/57/F/B	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)	YES
141891001/59/F/B	INCLUSION	BMI between 18 and 38 kg/m2 at screening	NO
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
141891002/49/F/B	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
141891003/52/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
141891006/57/F/W	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
141891007/53/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
141891009/52/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
	EXCLUSION	Inability to comply with the use of prohibited medications as described in Sections 6.8.1 and 10.6.	YES
141891010/54/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
141891011/63/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
	EXCLUSION	Inability to comply with the use of prohibited medications as described in Sections 6.8.1 and 10.6.	YES
141891012/51/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
141891013/56/F/B	INCLUSION	BMI between 18 and 38 kg/m2 at screening	NO
	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
141891014/53/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
141891015/62/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
141891016/52/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
141891018/52/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
141891019/58/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
141891020/53/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
	EXCLUSION	Inability to comply with the use of prohibited medications as described in Sections 6.8.1 and 10.6.	YES
141891021/64/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
141891022/53/F/B	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)	YES
141891024/62/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
	EXCLUSION	Inability to comply with the use of prohibited medications as described in Sections 6.8.1 and 10.6.	YES
141891025/59/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
141891026/55/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
141891030/43/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
141891031/54/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
141901003/43/F/B	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 3.0)	YES
	EXCLUSION	Any active ongoing condition that could cause difficulty in interpreting VMS such as: infection that could cause pyrexia, pheochromocytoma, carcinoid syndrome.	YES
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
	EXCLUSION	Any clinically significant prior or ongoing history of arrhythmias, heart block and QT prolongation either determined through clinical history or on ECG evaluation.	YES
	EXCLUSION	Any other history, condition, therapy, or uncontrolled intercurrent illness which could in the opinion of the investigator affect compliance with study requirements.	YES

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
	EXCLUSION	Any unexplained post-menopausal uterine bleeding.	YES
	EXCLUSION	At screening a suicidal ideation in the past 6 months (as indicated by 'Yes' on item 4 or item 5 of the suicidal ideation section of the eC-SSRS) or suicidal behavior (see protocol version 2.0)	YES
	EXCLUSION	Clinically relevant drug or alcohol abuse within 12 months of signing of informed consent. Clinically relevant alcohol or drug abuse is behavior that meets the DSM-5 (see protocol version 2.0)	YES
	EXCLUSION	Concurrent (or within 2 months prior to signing of ICF) participation in a clinical study with an investigational medicinal product (including medical devices).	YES
	EXCLUSION	Current or history (except complete remission for 5 years or more) of any malignancy (except basal and squamous cell skin tumours). Women receiving adjuvant endocrine (see protocol version 3.0)	YES
	EXCLUSION	Dependent on the investigator, the contract research organisation(s) or Sponsor for education or employment (e.g. family members, employees, people who receive grants/education).	YES
	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
	EXCLUSION	Inability to comply with the use of prohibited medications as described in Sections 6.8.1 and 10.6.	YES
	EXCLUSION	Known hypersensitivity to elinzanetant or any of the excipients in the formulation.	YES
	EXCLUSION	Renal impairment greater than moderate (i.e. estimated glomerular filtration rate < 30 mL/min/1.73m2) at screening	YES
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
141901004/63/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141901005/48/F/B	INCLUSION	Moderate to severe HF associated with the menopause and seeking treatment for this condition.	NO
141901006/48/F/B	EXCLUSION	Concurrent (or within 2 months prior to signing of ICF) participation in a clinical study with an investigational medicinal product (including medical devices).	YES
141901008/52/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
141901010/62/F/B	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 2.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 3.0)	YES
141901011/64/F/W	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
141901012/63/F/B	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
141901014/62/F/A	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
141901015/60/F/B	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
141901016/59/F/W	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 4.0)	NO
141901017/55/F/B	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
	EXCLUSION	Renal impairment greater than moderate (i.e. estimated glomerular filtration rate < 30 mL/min/1.73m2) at screening	YES
141901018/50/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
141901019/54/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
141901020/63/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
141901024/52/F/B	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
141901025/53/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
141901026/51/F/W	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
141901027/61/F/B	EXCLUSION	Any clinically significant prior or ongoing history of arrhythmias, heart block and QT prolongation either determined through clinical history or on ECG evaluation.	YES
141901028/61/F/W	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)	YES
141901031/63/F/B	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
141901033/63/F/B	EXCLUSION	Concurrent (or within 2 months prior to signing of ICF) participation in a clinical study with an investigational medicinal product (including medical devices).	YES
141901036/55/F/B	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
141931001/57/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141931002/57/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
141931003/48/F/W	INCLUSION	BMI between 18 and 38 kg/m2 at screening	NO
	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
141931004/57/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141931005/46/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141931007/62/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141931008/59/F/B	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
141931009/50/F/B	INCLUSION	BMI between 18 and 38 kg/m2 at screening	NO
141931010/55/F/NR	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
141931011/43/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
141931012/52/F/B	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
141931013/56/F/B	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
141931014/55/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
141931015/53/F/B	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
141931016/52/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
141931017/42/F/NR	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
141931018/59/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
141931019/56/F/B	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)	YES
141931022/64/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
141931023/55/F/B	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
141931026/49/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
141951002/64/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141951003/57/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141951004/58/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
141951005/55/F/W	EXCLUSION	Concurrent (or within 2 months prior to signing of ICF) participation in a clinical study with an investigational medicinal product (including medical devices).	YES
141951006/53/F/B	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 4.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
141951008/49/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)	YES
141951009/49/F/W	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
141951010/52/F/B	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
141951011/55/F/MUL	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
141951012/51/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO

142041001/51/F/B	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
142041002/59/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
142041003/62/F/B	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
142041004/63/F/W	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
142041005/55/F/AI	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
142041006/50/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
142041007/55/F/W	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
142041008/58/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
142041009/61/F/W	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO
142041010/56/F/W	EXCLUSION	Clinically relevant drug or alcohol abuse within 12 months of signing of informed consent. Clinically relevant alcohol or drug abuse is behavior that meets the DSM-5 (see protocol version 2.0)	YES
142061001/50/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
142111001/40/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
142111002/60/F/W	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
142111003/59/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
142111004/51/F/W	EXCLUSION	Inability to comply with the use of prohibited medications as described in Sections 6.8.1 and 10.6.	YES
142111005/44/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
142111006/56/F/W	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
142111007/61/F/W	EXCLUSION	Current or history (except complete remission for 5 years or more) of any malignancy (except basal and squamous cell skin tumours). Women receiving adjuvant endocrine (see protocol version 3.0)	YES
142111008/48/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
142111010/53/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
142111011/52/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
142111012/59/F/W	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
142111013/47/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
142111015/47/F/W	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO

220011003/49/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
220011004/56/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
220011005/56/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
220011007/51/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
220011008/54/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
220011009/53/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)	YES
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
220011011/52/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
220011013/57/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 4.0)	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
220011014/59/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
220011015/60/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 4.0)	NO
220011016/53/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)	YES
220021001/53/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
220021003/62/F/W	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO
	EXCLUSION	Any other history, condition, therapy, or uncontrolled intercurrent illness which could in the opinion of the investigator affect compliance with study requirements.	YES
220021004/50/F/W	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
220021005/49/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 3.0)	YES
	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
220021006/65/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO
220021007/65/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO
220021008/52/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
	EXCLUSION	Any unexplained post-menopausal uterine bleeding.	YES
220031001/49/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
220031002/65/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
220031007/56/F/W	INCLUSION	Moderate to severe HF associated with the menopause and seeking treatment for this condition.	NO
220031010/59/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
220031011/64/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
220031014/49/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
220031015/63/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
220031017/57/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
220031018/58/F/W	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)	YES
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
220031019/52/F/W	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)	YES
220031020/62/F/W	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)	YES
220031021/59/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
220031022/58/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
220031024/60/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
220041001/52/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
220041002/50/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
220041003/51/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
220041006/52/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
220041007/54/F/W	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 4.0)	NO
	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
220041008/57/F/W	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 4.0)	NO
220051001/54/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
220051002/55/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
220051003/54/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
220051009/58/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
220071002/53/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
220071003/47/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
300011001/47/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant prior or ongoing history of arrhythmias, heart block and QT prolongation either determined through clinical history or on ECG evaluation.	YES
300011002/56/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
300011003/50/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
300011004/53/F/W	INCLUSION	Moderate to severe HF associated with the menopause and seeking treatment for this condition.	NO
300011005/57/F/W	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
300011006/52/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
300011007/59/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
300011010/55/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
300021002/45/F/W	INCLUSION	Moderate to severe HF associated with the menopause and seeking treatment for this condition.	NO
300021006/61/F/W	EXCLUSION	Any clinically significant prior or ongoing history of arrhythmias, heart block and QT prolongation either determined through clinical history or on ECG evaluation.	YES
300021008/61/F/W	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)	YES
	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
300021009/58/F/W	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
300021010/52/F/W	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
300031001/59/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO

380011018/49/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
380011021/47/F/W	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
380011022/49/F/W	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
380011026/55/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
380011027/57/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
380011028/57/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
380011029/62/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
380011030/55/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant prior or ongoing history of arrhythmias, heart block and QT prolongation either determined through clinical history or on ECG evaluation.	YES
380021003/53/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
380051006/56/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
380051007/55/F/W	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
380061002/50/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
380061003/48/F/NR	INCLUSION	BMI between 18 and 38 kg/m2 at screening	NO
380061004/56/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
380061006/47/F/W	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN unless explained by (see protocol version 2.0)	YES
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in exclusion criteria 10).	YES
380061008/53/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
380061012/57/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	At screening a suicidal ideation in the past 6 months (as indicated by 'Yes' on item 4 or item 5 of the suicidal ideation section of the eC-SSRS) or suicidal behavior (see protocol version 2.0)	YES
380061013/48/F/W	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
380061014/49/F/W	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
380061017/54/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
380061018/60/F/W	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)	YES
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
380061021/49/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
380061022/59/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
380071003/42/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 3.0)	YES

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
380071006/53/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
380071008/56/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 3.0)	YES
380071012/63/F/W	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN unless explained by (see protocol version 2.0)	YES
380071013/50/F/W	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)	YES
380091002/59/F/W	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO
	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
380091006/47/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
380091008/44/F/W	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 3.0)	YES
	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
380101005/51/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
380101013/43/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 3.0)	YES
380101015/51/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 3.0)	YES
380101020/49/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
380111002/49/F/W	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
380111003/50/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
380111007/54/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
380111008/50/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
380111009/51/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
390011001/55/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
390011002/52/F/W	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN unless explained by (see protocol version 2.0)	YES
390011003/52/F/W	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)	YES
	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
390011004/56/F/W	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO
390011005/56/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
390011006/59/F/W	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)	YES
	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
390011007/51/F/W	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 4.0)	NO
390011008/50/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
390011009/59/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
390031001/55/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
390071001/51/F/W	INCLUSION	Females aged 40 to 65 years, inclusive, at signing of informed consent.	NO
	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
390071003/55/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
390071004/54/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
390071005/57/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
390081002/55/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
440011002/55/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
440011003/52/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
440011004/61/F/W	EXCLUSION	Inability to comply with the use of prohibited medications as described in Sections 6.8.1 and 10.6.	YES
440011005/51/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
	EXCLUSION	A history of untreated hyperthyroidism or hypothyroidism. Treated hypothyroidism with normal thyroid function test results during screening and a stable (for >= 3 months (see protocol version 2.0)	YES
440011006/52/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN unless explained by (see protocol version 2.0)	YES
440011008/51/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
440011011/52/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
440011013/56/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
440011014/49/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
440011015/52/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 3.0)	YES
440011017/50/F/B	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
440011018/58/F/W	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 2.0)	NO
	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
440011019/61/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
440011022/49/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
440011024/46/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)	YES
440011025/54/F/W	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
440011026/51/F/W	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 4.0)	NO
440011027/58/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
440011029/54/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
440021001/55/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
440021003/49/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	EXCLUSION	A history of untreated hyperthyroidism or hypothyroidism. Treated hypothyroidism with normal thyroid function test results during screening and a stable (for >= 3 months (see protocol version 2.0)	YES
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN unless explained by (see protocol version 2.0)	YES
440021004/59/F/W	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
440021005/46/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
440021007/58/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
440021008/55/F/W	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
440021009/60/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
440021010/60/F/W	INCLUSION	BMI between 18 and 38 kg/m2 at screening	NO
	INCLUSION	Females aged 40 to 65 years, inclusive, at signing of informed consent.	NO
	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	INCLUSION	Moderate to severe HF associated with the menopause and seeking treatment for this condition.	NO
	INCLUSION	Negative urine pregnancy test at screening.	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 4.0)	NO
	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO
	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
440021012/56/F/W	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
440021014/61/F/W	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
440021015/55/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
440021016/54/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
440021017/54/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
440021018/54/F/W	INCLUSION	BMI between 18 and 38 kg/m2 at screening	NO
	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
	INCLUSION	Females aged 40 to 65 years, inclusive, at signing of informed consent.	NO
	INCLUSION	Moderate to severe HF associated with the menopause and seeking treatment for this condition.	NO
	INCLUSION	Negative urine pregnancy test at screening.	NO
	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 4.0)	NO
	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO
	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
440021019/55/F/W	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO
440021020/52/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
440031001/56/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
	EXCLUSION	Inability to comply with the use of prohibited medications as described in Sections 6.8.1 and 10.6.	YES
440031002/52/F/W	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 2.0)	NO
	EXCLUSION	Any other history, condition, therapy, or uncontrolled intercurrent illness which could in the opinion of the investigator affect compliance with study requirements.	YES
440031003/50/F/W	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN unless explained by (see protocol version 2.0)	YES
440031008/57/F/W	INCLUSION	BMI between 18 and 38 kg/m2 at screening	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
440031009/59/F/W	INCLUSION	Normal or clinically insignificant cervical cytology not requiring further follow-up: a. A cervical cytology sample has to be obtained during screening, or b. A documented (see protocol version 2.0)	NO
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 3.0)	YES
	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
440031010/53/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
440031011/54/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
440031013/58/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant prior or ongoing history of arrhythmias, heart block and QT prolongation either determined through clinical history or on ECG evaluation.	YES
440031014/55/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
440031015/55/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
440031016/51/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
440031018/52/F/W	INCLUSION	Moderate to severe HF associated with the menopause and seeking treatment for this condition.	NO
	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
440031019/53/F/W	INCLUSION	Participant has a screening mammogram performed, unless she is able to provide a written normal mammogram result obtained no more than 6 months prior to the start of screening.	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
440031020/51/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
440031021/50/F/W	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
440031022/48/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
440051001/55/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
440051003/53/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO
440051004/62/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
440051005/56/F/W	INCLUSION	BMI between 18 and 38 kg/m2 at screening	NO
440051006/48/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 2.0)	NO
440051007/45/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
440051008/61/F/W	INCLUSION	Moderate to severe HF associated with the menopause and seeking treatment for this condition.	NO
440051009/62/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
440051010/48/F/W	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
	EXCLUSION	Inability to comply with the use of prohibited medications as described in Sections 6.8.1 and 10.6.	YES
440051012/56/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
440051014/58/F/W	EXCLUSION	Clinically relevant abnormal findings on mammogram. Clinically relevant abnormal finding is defined as any finding that requires further follow-up or diagnostic procedures per local guidelines.	YES
440051015/59/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
440051017/49/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion (see protocol version 4.0)	YES
440051018/59/F/W	INCLUSION	Capable of giving signed informed consent as described in Section 10.1.5 which includes compliance with the requirements and restrictions listed in the ICF and in this protocol.	NO
440051019/58/F/W	EXCLUSION	Has used and is unwilling to wash-out use of any of the prohibited concomitant medications, as specified in Section 10.6.	YES
460021002/48/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 2.0)	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN unless explained by (see protocol version 2.0)	YES
460021003/53/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
460031001/48/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
460031002/56/F/W	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
460031003/57/F/W	EXCLUSION	Uncontrolled or treatment-resistant hypertension. Women with mild hypertension can be included in the study if they are medically cleared prior to study participation. (see protocol version 2.0)	YES
460031006/50/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
460061001/53/F/W	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 3.0)	YES
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
460061003/49/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
460061004/45/F/W	EXCLUSION	Abnormal liver parameters (presence of at least one of the following criteria): AST > 2 x ULN or ALT > 2 x ULN or AP > 2 x ULN or TBL > ULN or INR > ULN (see protocol version 4.0)	YES
460061006/61/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
460061007/57/F/W	INCLUSION	In good general health, in the opinion of the investigator, based on the medical history, physical examination, 12-lead ECG, vital signs, gynecological ultrasound, (see protocol version 3.0)	NO
460061009/50/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
460061010/55/F/W	EXCLUSION	Inability to comply with the study procedures for any reason, including the following examples: language comprehension, psychiatric illness, general inability to get to the study site.	YES
460061011/52/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
460061012/50/F/W	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
460061013/52/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
460061015/59/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
460061016/55/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
460061017/54/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO

Listing 10.2.4 / 2: Inclusion and exclusion criteria not met

Planned Treatment Group: .

Subject Identifier/ Age/ Sex/ Race	Inclusion/ Exclusion Category	Inclusion/Exclusion Criterion	Inclusion/ Exclusion Answer
460061018/62/F/W	EXCLUSION	Untreated hyperthyroidism or hypothyroidism. a) Treated hyperthyroidism with no abnormal increase of thyroid function laboratory parameters and no relevant clinical signs (see protocol version 3.0)	YES
460061019/48/F/W	INCLUSION	Postmenopausal, defined as: a. at least 12 months of spontaneous amenorrhea prior to signing of informed consent, or b. at least 6 months of spontaneous amenorrhea prior to (see protocol version 3.0)	NO
460071002/50/F/W	EXCLUSION	Inability to comply with the use of prohibited medications as described in Sections 6.8.1 and 10.6.	YES
460071004/57/F/W	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
460071005/52/F/W	INCLUSION	BMI between 18 and 38 kg/m2 at screening	NO
	EXCLUSION	Any clinically significant abnormal laboratory test result(s) measured during screening (single re-test allowed, except for tests listed in inclusion criteria 2 and exclusion criteria 10).	YES
460071006/53/F/W	EXCLUSION	Disordered proliferative endometrium, endometrial hyperplasia, polyp, or endometrial cancer diagnosed based on endometrial biopsy during screening (see Section 8.2.9)	YES
460071008/62/F/W	INCLUSION	Participant has completed HFDD for at least 11 days during the two weeks preceding baseline visit, and participant has recorded at least 50 moderate or severe HF (see protocol version 2.0)	NO
